	A leading Austrian electrical equipment inquiry from the Rumanian Sogenal organi power stations and electrical equipment	Zation concerning the complex of
	the Bucharest electricity works. The following equipment is required by t	50X1-HUM
	a. Oil fields	•
	Four complete transformer stations is writches with small oil content, int verters, commutators and cathode constations (of which two require translately seven million Austrian cohill	errupter switches, voltage con- ductors. The total cost of these sformers of smaller size) is approximately
	verters, commutators and cathode con stations (of which two require transately seven million Austrian schill material 1,400,000 Austrian schillings and to schillings from	errupter switches, voltage con- ductors. The total cost of these sformers of smaller size) is approxi- ings including deliveries of to the value of 50X1-HUM the value of 65.000 Austrian
	verters, commutators and cathode con stations (of which two require transately seven million Austrian schill material 1,400,000 Austrian schillings and to schillings from carried out if one mundred percent produlars or Swiss francs. b. Bucharest Power Station	errupter switches, voltage conductors. The total cost of these sformers of smaller size) is approximans including deliveries of to the value of to the value of 50X1-HUM the value of 65,000 Austrian The above transaction will only be 50X1-HUM ayment is made either in United States
	verters, commutators and cathode constations (of which two require transately seven million Austrian schill material 1,400,000 Austrian schillings and to schillings from carried out if one nundred percent products or Swiss francs.	errupter switches, voltage conductors. The total cost of these sformers of smaller size) is approximans including deliveries of to the value of to the value of 50X1-HUM the value of 65,000 Austrian The above transaction will only be 50X1-HUM ayment is made either in United States
	verters, commutators and cathode constations (of which two require transately seven million Austrian schill material 1,400,000 Austrian schillings and to schillings from carried out if one mundred percent percent of the carried out if one mundred percent percent of the carried out if one mundred percent percent of the carried out if one mundred percent percent of the carried out if one mundred percent percent of the carried out if one mundred percent percent of the carried out if one mundred percent percent of the carried out if one mundred percent percent of the carried out if one mundred percent percent of the carried out if one mundred percent percent of the carried out if one mundred percent percent of the carried out if one mundred percent percent of the carried out if one mundred percent percent of the carried out if one mundred percent	errupter switches, voltage conductors. The total cost of these sformers of smaller size) is approximate including deliveries of to the value of 50X1-HUM the value of 65,000 Austrian The above transaction will only be 30X1-HUM ayment is made either in United States - 400 Kilovoltamperes
	verters, commutators and cathode constations (of which two require transactely seven million Austrian schill material 1,400,000 Austrian schillings and to schillings from carried out if one hundred percent percent of collars or Swiss francs. b. Bucharest Power Station 250 transformers with capacity of 50 160 meters of 1 - 70 horsepower Three phase star shaped switches Motor protection switches Elimite conductors et cetera	errupter switches, voltage conductors. The total cost of these sformers of smaller size) is approximate including deliveries of to the value of 50X1-HUM the value of 65,000 Austrian The above transaction will only be 30X1-HUM ayment is made either in United States - 400 Kilovoltamperes
	reters, commutators and cathode constations (of which two require transately seven million Austrian schill material a, 100,000 Austrian schillings and to schillings from carried out if one nundred percent percent of schillings or Swiss francs. b. Bucharest Power Station 250 transformers with capacity of 50 160 meters of 1 - 70 horsepower Three phase star shaped switches Motor protection switches Elimite conductors et cetera Payment for the above in United States	errupter switches, voltage conductors. The total cost of these sformers of smaller size) is approximate including deliveries of to the value of to the value of 50X1-HUM the value of 65,000 Austrian the above transaction will only be 50X1-HUM ayment is made either in United States - 400 Kilovoltamperes - 400 Kilovoltamperes - 400 CHANGE in Class. Declassified Class. CHANGED TO: TS S C DDA Memo, 4 Apr 77 Auth: DDA REG. 77/1733 Date: 27/04/78 Date: 27/04/78 50X1-HUM
STATE	reters, commutators and cathode constations (of which two require transately seven million Austrian schill material 1,400,000 Austrian schillings and to schillings from carried out if one hundred percent percent of collars or Swiss francs. b. Bucharest Power Station 250 transformers with capacity of 50 160 meters of 1 - 70 horsepower Three phase star shaped switches Motor protection switches Elinite conductors et cetera Payment for the above in United States	errupter switches, voltage conductors. The total cost of these sformers of smaller size) is approximate including deliveries of to the value of to the value of 50X1-HUM the value of 65,000 Austrian the above transaction will only be 50X1-HUM ayment is made either in United States - 400 Kilovoltamperes - 400 Kilovoltamperes - 400 CHANGE in Class.
